

POLYURETHANE SEALANT 93555

CURING AGENT 63055

Description: BAJAK'S 93555 is a two component Polyurethane sealant based on special

polyols and Isocyanate resins with an excellent flexibility and expanding

properties on different surfaces.

Recomm ended use: As a joint sealant for expantion joint and simmilar surface.

Service temperature: Dry: Maximum 80°C Wet: Maximum 50°C

PHYSICAL CONSTANTS:

Colors/Shade No: Gray
Finish: Gloss
Volume Solid: 100%
Weight Solid: 100%

Theoretical spreading rate: 1.0 m2 /liter 1000 Mic. Dft.

Flash point: 96°C

Specific gravity: 1.4 – 1.45 kg/liter

Surface dry: Max. 16 hours at 20°C (ISO 1517)

Dry to touch: Max. 24 hours at 20°C

Fully cured: 7 days at 20°C

V.O.C.: 0 gr/liter

Shelf life: 1 Year (25°C) from time of production. Depending on storage condition, mechanic

stirring may be necessary before usage.

APPLICATION DETAILS:

Mixing ratio for 93555 Base 93555 : Curing agent 63055

6 : 1 by weight

Application method: Blade and roll Thinner (max. vol.) Not recommend

Pot life: 50 min. (20°C) 50 milliliter

Cleaning of tools: 08050

Indicated thickness, dry: 10 mili-meters
Indicated thickness, wet: 10 mili-miters
Recoat interval, min: 24 hours (20°C)

Recoat interval, max: 7 days (20°C), See REMARKS overleaf

Issued: Feb.2016

BAJAK'S POLYURETHANE SEALANT 93555

APPLICATION AND CURING CONDITIONS:

The surface must be completely clean and dry at the time of application. And its temperature must be above the dew point to avoid condensation. Minimum temperature for curing is -5°C.

At the freezing point and below, beware of the risk of ice on the surface which will hinder the adhesion. High humidity and/or condensation during application and the following 16 hours may adversely affect the film formation.

Maximum concrete moisture content should be 4%.

In confined spaces provide adequate ventilation during application and drying.

PRECEDING COAT:

BAJAK'S EPOXY SEALER 23020 for concrete surface.

SUBSEQUENT

COAT:

Acc. to specification.

REMARKS:

Film thicknesses:

May be specified in another thickness than indicated depending on purpose and area of use

This will alter spreading rate and may influence drying time and recoating interval

Thinning:

Physical property:

Not recommend.

Type of Physical property:	Result	Unit	Standard
Pressure strength	300	Kgf/cm2	ASTM D695M
Elongation strength	150	Kgf/cm2	ASTM D638M
Abrasion Resistance	<25 mg	1000 cycle	ASTM D4060
Elongation at break	>100	%	ASTM D638M

A completely clean surface is mandatory to ensure intercoat adhesion, especially at long recoating intervals. Any dirt,oil,and grease have to be removed, e.g. with suitable detergent.

Salts to be removed by fresh water hosing. To check an adequate quality of the surface cleaning a test patch is recommended before actual recoating.

SAFETY:

Handle with care. Before and during use, observe all safety labels on packaging and paint containers, consult BAJAK material safety data sheets and follow all local and national safety regulations. Harmful or fatal if swallowed; immediately seek medical assistance swallowed. Avoid inhalations of possible solvent vapors or paint mist, as well as paint contact with skin and eyes. Apply only on well-ventilated areas and ensure that adequate forced ventilation exists when applying paint in confined spaces or when the air is stagnant. Always take precautions against the risks of fire and explosions.
